

Steel Rebar & Reinforcement

Product Technical Sourcing Proposal
Construction Materials Equipment

Real supplier reference image. Final brand, model and appearance depend on selected quotation.

RECOMMENDED SUPPLY CONFIGURATION

Approve a representative sample and technical data before buying volume. Start with the smallest economical trial shipment and compare grade, specification, packaging, origin, freight and delivered cost.

Product Overview, Applications & Primary Use

Deformed steel rebar in multiple sizes supplied with tensile and bend tests for RC structures.

Technical sourcing approach

- Confirm the real operating duty and site conditions before comparing models.
- Compare supplier quotations against one common technical specification.
- Require a factory test, drawings, manuals and a critical-spares list.
- Plan freight, inspection, installation interfaces and after-sales support before purchase.

Applications and primary use

- Industrial use described for this material: Deformed steel rebar in multiple sizes supplied with tensile and bend tests for RC structures.
- Trial production and quality approval before regular imports.
- Replacement of an existing grade only after compatibility testing.
- Commercial supply based on confirmed monthly consumption and storage conditions.

Product-Specific Technical Specification

Selection parameter	Required function / value	Buyer or site input
Material/grade	Exact commercial grade or agreed equivalent	Provide current grade and application
Key properties	Meet the process-critical physical and chemical values	Mark required limits on the data sheet
Certification	Provide batch certificate or certificate of analysis	List testing and regulatory needs
Sample approval	Representative pre-shipment sample for production test	State sample quantity and test method
Packaging	Protect material through shipment and storage	Specify bag, drum, IBC or bulk format
Order quantity	Match trial or regular consumption	State trial quantity and monthly demand
Storage/shelf life	Remain stable under Afghan warehouse conditions	State temperature and shelf-life needs
Logistics	Suitable handling and transport classification	Provide destination and unloading limits

Buyer checklist and quotation requirements

- State exact application, current grade and acceptable equivalent brands.
- Provide required property limits, technical data sheet and certificate format.
- Approve a representative sample in the actual production process.
- Confirm packaging, palletising, shelf life and storage conditions.
- State trial quantity, forecast monthly demand and delivery destination.
- Separate material price, inland China cost, freight, insurance and clearance.
- Require batch identification and pre-shipment document review.

Final technical parameters, included accessories and acceptance criteria must be confirmed in the supplier quotation, test report and purchase contract. Do not purchase from photographs alone.

Indicative Product Pricing & Supply Guide

PRODUCT QUOTATION BASIS

Final pricing for Steel Rebar & Reinforcement follows the confirmed technical specification, required rating or capacity, included accessories, inspection scope, delivery terms and destination.

Supply component	Indicative planning range	Quotation basis
Samples and testing	US\$3k-30k	Approve quality before volume purchase
Trial commercial shipment	US\$1k-8k	Smallest economical order quantity
Freight and clearance	US\$2k-10k	Consolidated cargo where permitted
Handling and initial stock	US\$1k-6k	Only required launch inventory
Low-entry procurement total	US\$7k-54k	Final cost follows grade and shipment size

Technical sourcing and delivery process

Phase 1	Define requirement and request comparable quotations - 1 to 2 weeks
Phase 2	Technical clarification, negotiation and inspection plan - 1 to 3 weeks
Phase 3	Manufacture or refurbishment - typically 3 to 10 weeks
Phase 4	Shipping and customs clearance - typically 3 to 7 weeks
Phase 5	Local installation, training and trial operation - 1 to 3 weeks

These are non-binding planning ranges. Final product price and delivered cost depend on the confirmed specification, accessories, inspection, freight, customs, exchange rate and destination.

Sanaatchi Support & Contact

- Supplier search using one confirmed product specification
- Side-by-side technical and commercial quotation comparison
- Factory test, documentation and pre-shipment inspection coordination
- Lowest-cost practical logistics planning from China to Afghanistan
- Installation-interface, spare-parts and after-sales coordination
